Anhanguera Educacional

Software Engineering Bachelor's

January 2023 - In Progress

Professional Experience

Kost, Ltda

Front-end Developer.

September - November (2 Months)

- I helped with planning the corporate website with a focus on the intuitive presentation of the company with its products and services.
- I've used **JavaScript**, **TypeScript** and **React.js** with focus on responsive design

M&M Informática

Tech Assistant

May 2018 - January 2019 (8 Months)

- I performed several functions from customer service to assistance in technical maintenance, management and control of orders
- also helping to resolve technical problems with both hardware and software.

Projects

Automation of Validation

A script that generates automated daily alerts with tables.

- I increased efficiency in checking validity periods by integrating Google Sheets with Gmail using JavaScript, providing automation that generates alerts of daily due dates in table format that helped in more effective management of the sectors as a whole, thus making it unnecessary for several people to travel to Check manually, saving time.

Portfolio

An application to demonstrate my media and experiences.

- Next.js on the Front-end, using server-side-rendering to improve page loading speed and user experience.
- I've adopted SEO techniques to optimize the project's visibility in search engines, such as using friendly urls and relevant meta tags.

Skills

Programming languages:

9 Months - HTML & CSS • Javascript

Tech Skills - React • Javascript • Node.js • Next.js • Git/Github • Linux • REST API • Docker • Typescript • Java
